🎓 EDUCATION

Australian National University, Australia 2021 – Present

Ph.D in Computer Science, expected January 2026

Advisors: Prof.Hongdong Li, Dr.Chuong Nguyen

Research Focus: 3D Computer Vision, 3D Reconstruction, Neural Rendering

Zhejiang University, China 2015 – 2018

Master in Optical Engineering

Tianjin University, China 2011 – 2015

B.S. in Electronics Engineering

👤 EXPERIENCE

HJIMI Inc. Beijing, China **Machine Learning Engineer** 2018 – 2021

- Developed robust face detection, anti-spoofing, and recognition algorithms for a commercial face-id system.
- Passed the National Bank Card Testing Center's (BCTC) security certification for the facial recognition payment system.

📄 PREPRINTS

1. **Jinguang Tong**, Xuesong Li, Sundaram Muthu, Fahira Afzal Maken, Chuong Nguyen, Hongdong Li. "S²GS: Self-supervised Gaussian Segmentation for Automatic 3D Object Scanning", Under review.
2. Qing Zhang, Zehao Chen, **Jinguang Tong**, Jing Zhang, Jie Hong and Xuesong Li. "Viewpoint Consistency in 3D Generation via Attention and CLIP Guidance", arXiv, 2024.
3. Xuesong Li, **Jinguang Tong**, Jie Hong, Vivien Rolland and Lars Petersson, "DGNS: Deformable Gaussian Splatting and Dynamic Neural Surface for Monocular Dynamic 3D Reconstruction", arXiv, 2024.

📖 PUBLICATIONS

1. **Jinguang Tong**, Xuesong Li, Fahira Afzal Maken, Sundaram Muthu, Chuong Nguyen, and Hongdong Li. "GS-2DGS: Geometrically supervised 2DGS for reflective object reconstruction", In CVPR, 2025.
2. Chushan Zhang*, **Jinguang Tong***, Tao Jun Lin, Chuong Nguyen, and Hongdong Li. "PMVC: Promoting Multi-View Consistency for 3D Scene Reconstruction", In WACV, 2024. (* equal contribution)
3. **Jinguang Tong**, Sundaram Muthu, Fahira Afzal Maken, Chuong Nguyen, and Hongdong Li. "Seeing through the glass: Neural 3d reconstruction of object inside a transparent container", In CVPR, 2023.
4. Jiahao Ma, **Jinguang Tong**, Shan Wang, Wei Zhao, Zicheng Duan, and Chuong Nguyen. "Voxelized 3d feature aggregation for multiview detection", In DICTA, 2024.

⚙️ SKILLS & INTERESTS

Technical Skills:

- **Programming:** Python, C/C++, PyTorch
- **Methodologies:** Neural Rendering, 3D Gaussian Splatting, Diffusion models

Research Interests:

I am deeply interested in advancing the field of 3D computer vision with a focus on both reconstruction and generation. My research explores innovative approaches in:

- **3D Reconstruction:** Investigating robust multi-view reconstruction methods and novel techniques for recovering accurate 3D geometry from sparse or dynamic data.

- **Neural Rendering:** Pushing the boundaries of neural rendering techniques to produce photorealistic images.
- **3D Generation:** Developing generative models for creating high-fidelity 3D contents.

i TEACHING AND SERVICE

Teaching Assistant:

- (Head) COMP4610, Computer Graphics, ANU, (2023S2, 2024S1).
- ENGN8501, Advanced Topics in Computer Vision, ANU, (2022S2, 2023S2).
- ENGN6528, Computer Vision, ANU, (2023S1, 2024S1).

Professional Service:

- Conference Reviewer: CVPR, ICLR.
- Journal Reviewer: IEEE TPAMI, IEEE RA-L, IEEE TCSVT, IET CV.

⌚ HONORS AND AWARDS

Outstanding Graduate Student, Zhejiang University
Outstanding Undergraduate Student

March. 2018
Jun. 2015
